**OLD DOMINION
UNIVERSITY**

Old Dominion University will launch the OpenSeas Technology Hub in partnership with the Port of Virginia, Virginia Maritime Association and City of Norfolk. This incubator space will grow new businesses in the maritime technology field to improve working and living with water. By connecting entrepreneurs and startups to the resources of research universities, labs and private sector industry partners, the hub will spark breakthroughs in maritime, logistics, aquaculture and resilience in the local water-based ecosystem.

ODU and OpenSeas will accelerate research and innovation to further Virginia's leadership in maritime technology. Through the world-renowned International Maritime Institute, ODU offers undergraduate and graduate degrees in Maritime and Supply Chain Management to propel commerce through education and research. 100% of program alumni are employed in the industry.
